### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Garret V Davis on August 20, 2007.

The application has been amended as follows:

In claim 1, line 6, after v--diameter-- the phrase " of 1.0 to 4.9  $\mu\text{M}$ " has been added.

2. The following is an examiner's statement of reasons for allowance: the prior art does not teach nor suggest a paper as it now claimed. Specifically, the prior art does not teach a paper with the claimed static coefficient, containing Alkenyl ketene dimers, a surface modifying agent, light calcium carbonate with the claimed particle size range and from 1 to 30% by weight within the paper. Note that as it is now claimed, the cited references do not have at least one of the claimed properties, and therefore, it cannot be said that the other property/properties is/are inherent.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
